

Manikya N.

Uttarakhand, India | m4n1kya2005@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Professional Summary

Computer Science undergraduate with a 9.21 CGPA and hands-on experience developing full-stack and AI-based applications. Familiar with Java, JavaScript, TypeScript, React, Next.js, Node.js, SQL, REST APIs, and authentication. Strong understanding of Data Structures & Algorithms, OOP, DBMS, Operating Systems, and Computer Networks.

Education

Vellore Institute Of Technology, Bhopal

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Aug 2023 – May 2027

CGPA: 9.21 / 10.00

Technical Skills

Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, REST APIs, JWT

Languages & Frameworks: Java, JavaScript, TypeScript, SQL, React.js, Next.js, Node.js, Express.js, NestJS, Prisma

Tools, Cloud & AI: Git, GitHub, Docker, AWS, Kubernetes, CI/CD, Google Gemini API, Qwen2.5, Ollama

Experience

MPOnline Limited (Govt. of MP & TCS JV)

Advanced Software Engineering & Development Intern

May 2026 – Aug 2026

Bhopal, India

- Built REST APIs and backend components using Java, C++, Python, and SQL in an industry-oriented engineering program.
- Applied SDLC and Agile methodologies across 6 sprints with comprehensive unit and integration testing for live projects.
- Tested 20+ API endpoints using Postman, documented with Swagger, and managed code with Git for version control.
- Collaborated with senior engineers on database design and systematic debugging to deliver reliable software features.

Ethnus

MERN Stack Intern

Jul 2024 – Oct 2024

Remote

- Developed 4 full-stack application modules using MongoDB, Express.js, React.js, and Node.js with modular component architecture.
- Built 15+ RESTful APIs with JWT-based authentication and secure CRUD operations for core application features.
- Created 10+ responsive React interfaces using Redux for state management and Tailwind CSS for consistent styling.
- Optimized MongoDB queries with strategic indexing and aggregation pipelines, reducing API response latency by 40%.

Projects

AshenRitual – Full-Stack E-Commerce Platform [Live Demo](#)

Next.js, TypeScript, NestJS, PostgreSQL, Prisma, REST APIs, JWT, Gemini API

Feb 2026 – Present

[GitHub](#)

- Architected a scalable full-stack e-commerce platform using Next.js, TypeScript, NestJS, PostgreSQL, and Prisma ORM.
- Designed 50+ REST API endpoints across 25+ Prisma models with comprehensive input validation and error handling.
- Secured 20+ routes with JWT authentication, HTTP-only refresh tokens, RBAC, bcrypt, Helmet, and rate limiting.
- Built VESPER, an AI-powered wardrobe intelligence system using Google Gemini API for personalized outfit recommendations.
- Implemented responsive UI using Tailwind CSS, Framer Motion, and React Server Components for performance and SEO.

Uni-Ease – Campus Resource Management Platform

React, Node.js, Express.js, MongoDB, REST APIs, JWT, RBAC, Tailwind CSS

Mar 2025 – Jul 2025

[GitHub](#)

- Led end-to-end development of a MERN-based campus platform with 20+ RESTful APIs for resource booking and user management.
- Implemented JWT authentication and role-based access control across 3 user roles for secure permission-based access.
- Built MongoDB aggregation pipelines for analytics dashboards and integrated an AI-powered assistant for campus queries.

EcoLoop – Intelligent Building Energy Optimization

Python, EnergyPlus, Qwen2.5, Ollama, Streamlit, Pandas, Plotly

May 2026 – Jul 2026

[GitHub](#)

- Built an automated energy optimization platform integrating EnergyPlus building simulations with Qwen2.5 through Ollama.
- Engineered a modular Python pipeline to automate EnergyPlus simulation execution, process building energy data, and generate AI-driven optimization recommendations, achieving a 3.57% reduction in simulated electricity consumption.
- Created interactive Streamlit dashboards with Plotly visualizations for real-time building energy performance monitoring.

Achievements & Certifications

- NPTEL Gold Elite (Top 5%) in Marketing Analytics and completed Machine Learning certification from NPTEL in May 2025.
- Completed 100-day Java coding challenge focused on Data Structures and Algorithms with 200+ practice problems solved.
- Earned MERN Stack certification from Ethnus and Blockchain Specialization from University at Buffalo in Oct 2025.
- Served as Disciplinary In-Charge at Winter Fest 2025, coordinating 15+ team members for a 2000+ attendee university event.

Industrial Exposure

- **C-DAC Bangalore (Sep 2025):** Explored high-performance computing environments, supercomputer architecture, parallel computing, and distributed systems through practical demonstrations.
- **BSNL RGMTC Chennai (Oct 2025):** Studied telecom infrastructure, routing, switching, network protocols, optical fiber communication, and network architecture through technical sessions.
